

Hi, I'm Ahyoung Ryu.

I care most about building products that solve a real problem for the people using them. I currently work on the AI Agent Messenger SDK and Chat UIKit at Sendbird.

Experience

2023.04 – Present

Sendbird

Senior Software Engineer · Client Platform · AI Agent

At Sendbird, I build the AI Agent Messenger SDK and Chat UIKit. I also work directly with customers adopting the SDK and maintain the older UIKit codebase.

- Built the React SDK and proof-of-concept environments that early customers used in their own services.

Tech TypeScript · React · Vite · pnpm · Yarn Berry · GitHub Actions

2021.04 – 2023.02

TossBank

Front-end Engineer · Loan Tribe · Personal Loan

I was the sole front-end engineer for TossBank's personal-loan application and management screens before the bank launched.

- Designed webview screens, app-bridge abstractions, and web-scraping communication modules for personal loans.

Tech TypeScript · React · Next.js · React Query · Recoil · WebdriverIO

2020.03 – 2021.04

Lunit

Front-end Engineer

Designed and built digital-pathology annotation and AI-result visualization tools.

- Rebuilt a debt-heavy annotation tool with a new stack in six weeks.

Tech TypeScript · React · Redux · Redux Saga · Web Worker · OffscreenCanvas

2017.08 – 2020.03

Zepl

Front-end Engineer

Improved the core notebook experience and data-visualization performance of an Apache Zeppelin-based SaaS product.

- Improved notebook interaction responsiveness by 100% to 300% and rebuilt the core AngularJS notebook in React.

Tech JavaScript · React · AngularJS · Redux Saga · Web Worker · D3

Selected work

Sendbird

2025-01 – Present

AI Agent Messenger SDK

A React-based Messenger SDK that lets customers integrate and validate AI agents across web and webview environments.

- Designed and evolved the React SDK API and component architecture for customer environments.
- Supported early PoCs and a live A/B test to shorten the product feedback cycle.

Tech TypeScript · React · Vite · pnpm · CircleCI

Sendbird
2024-06 – 2024-12

Chat UIKit Modernization

Reworked five years of React legacy code and raised test coverage from 22.51% to 50%.

- Redesigned a React codebase with five years of accumulated legacy and established the test strategy.
- Raised test coverage from 22.51% to 50% and reduced customer issues by about 30%.

Tech TypeScript · React · Jest · Testing Library

TossBank
2021-04 – 2023-02

TossBank Personal-loan Funnel

Owned every webview screen required to apply for and manage personal-loan products from before TossBank's launch.

- Built web-to-app protocols and the web-scraping communication module. Set up mobile E2E testing for launch.
- Launched the personal-loan application and management experience with TossBank and continued to operate it.

Tech TypeScript · React · Next.js · React Query · Recoil

Lunit
2020-03 – 2021-04

Digital Pathology Annotation & Visualization

A set of browser tools for annotating pathology slides and visualizing AI-analysis results.

- Selected the stack and architecture, then rebuilt the existing Annotation Tool in six weeks.
- Used Web Workers and OffscreenCanvas to visualize AI results on large pathology images.

Tech TypeScript · React · Redux Saga · Immer · Web Worker

Zep1
2018-06 – 2019-03

Zep1 Notebook & Visualization Performance

Modernized the rendering architecture and large-chart pipeline of Zep1's core notebook experience.

- Introduced a Web Worker data pipeline and seven canvas-based Nivo chart types.
- Improved key interaction speed by between 100% and 300% and eliminated page freezes on large graphs.

Tech React · AngularJS · Redux Saga · Web Worker · Nivo

More of my work

Open source

Apache Zeppelin committer and PMC member. Ranked ninth among 338 contributors with 104 commits.

Teaching and talks

Taught an 11-hour Apache Zeppelin course at Fast Campus and spoke at ApacheCon Europe and North America.
